LOGISTICS PARK

Karun Parks specializes in providing logistically suited locations that are long-term and strategically located. The clients get an opportunity to specify a facility tailored to meet their requirement in terms of size and layout but at the same time keeping the long-term business horizon and compliance requirements in mind as one of the key decision-making parameters.

INDUSTRIAL PARK

Industrial Solutions Tailored to your business needs. We believe in understanding your needs and working together with you to develop the best solution that are both cost and operationally efficient to run your Manufacturing process.

INDUSTRIAL INFRASTRUCTURE CONSULTING

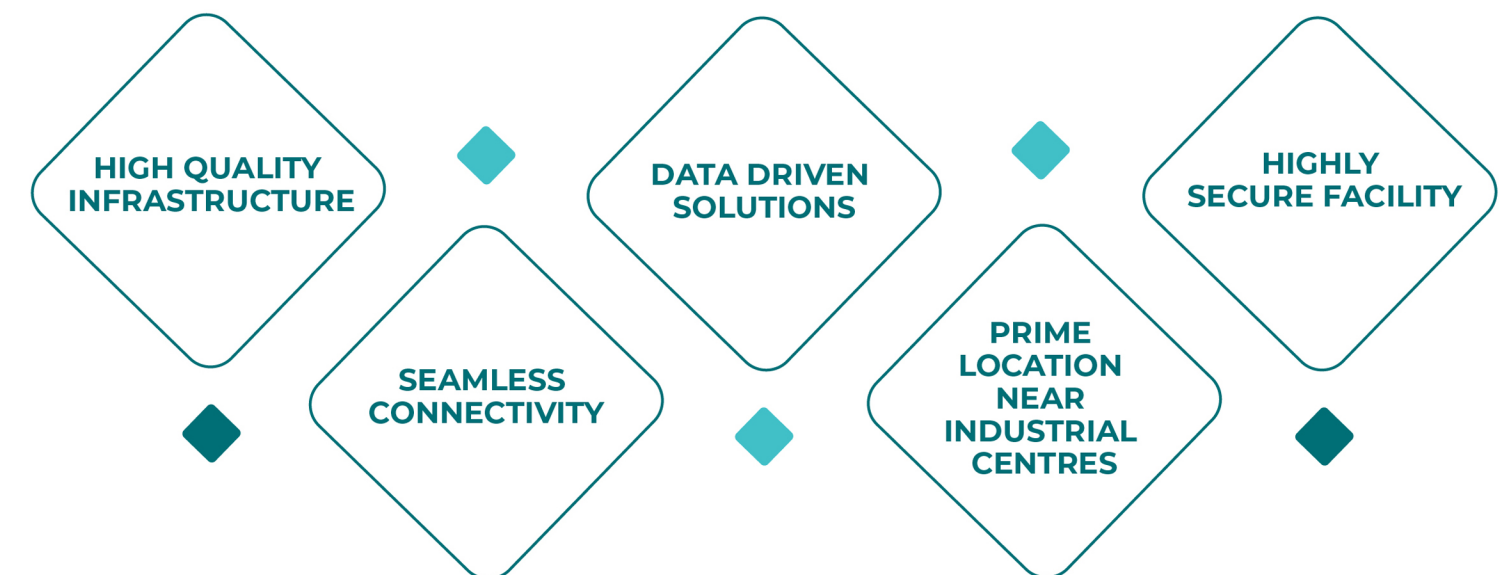

We provide an end-to-end solution in the Industrial & Warehousing domain. We have a team of people led by thorough professionals that can provide any kind of solution – whether it is procuring land parcels and government approvals, execution of the complete project as EPC contractors and last but not the least, our expertise of providing a high-quality premises on long-term lease.

ABOUT US

Karun Parks is the flagship Warehousing Project of Karun Ventures in Vadodara, Gujarat, India. We envision ourselves as creators of world-class industrial & logistics infrastructure that supports the economic development of the country and maximizes the ROI for our customers and enhances the brand which evolves in the entire journey. Our aim is to consistently provide superior, customized and innovative solutions through our expert team led by thorough professionals whose main focus is on customer service and providing high-quality government compliant infrastructure. With expertise of precision and accuracy, it allows our customers to gain a competitive advantage.

OUR ADVANTAGES

WHY CHOOSE US

Karun Parks aims to provide more than just a space for its corporate customers. We provide a deep dive analysis taking into consideration all the geographical, economic and political conditions at ground zero level and come up with a solution and location that will be valid for next 20 years. We use linkage mapping to various industrial corridors for efficient domestic and international freight logistics and proximity to the key industrial centres for advantageous primary logistics movement.
